A wizard was asked how old he was. He replied in a riddle: "I am still very young as wizards go. I am only three times my son's age. My father is 40 years more than twice my age. Together the three of us are a mere 1240 years old." How old is the wizard? Options ranging from;

Ans You have three variables: w, s, and f

$$w = 3s$$

$$f = 2w + 40$$

$$w + s + f = 1240$$

Substitute to solve for "w"

$$w + (1/3)w + 2w + 40 = 1240$$

$$3w + (1/3)w = 1200$$

$$(10/3)w = 1200$$

$$w = 3 \times 120$$

w = 360 years old (the wizard's age)

s = (1/3)w = 120 year old (the son's age)

f = 2w + 40 = 760 (years old (the father's age)

I wrote the test today.... The questions are broken down into Numerical, Verbal, Data interpretation, Current Affairs and banking awareness. The questions are not following any particular order we know.

Firstly the maths aspect is not that tough except you haven't practiced enough, i found out i haven't practiced enough.

So try to revise questions with *speed, time and miles*, questions about *age* when my son is x -yrs younger than my father, questions with *ratio* 3300 laborers can manage 457 grammes of stock in 7days, how long will it last if an additional 8 men were added... Etc

Also revise data interpretation... Graphs and diagrams at least 10 questions.... Coming at different times.

For the others, secretary general of the UN, head of common wealth, head of authority ecowas, countries making up ecowas, confirm countries where Fbn group has businesses(africa and abroad), Something about the UN council, core divisions of ecowas, one question on financial inclusion banking, core cbn duty... Etc

Verbal... Opposite of Dauntless, quiet, frugal. Words relating to loquacious, cowardly.... Can remember anymore good luck guyz.

I don't believe i did well, but it doesn't mean you guyz shouldn't have a better chance.

Do not ask me any more questions, i will be logging out immediately.
